arranged Alphabetically is Regard to BUSINESS AND NAMES.

The name of the bank superintended at the State of New York, for the fiscal year ending the 30th of September, 1859, states that less than \$1,200,000,000 is now held in trust by the banks, and that nearly one-half of what is so held is an increase in existing associations.

Mr. Green, after comparing his predictions with the average yearly additions to the banking interest of the past few years, argued that it was evident that capital was being accumulated at the rate of one-half per cent. per annum in the prosecution of the business of banking, or that profits are decreasing, or that other elements are being established which will more than offset the increase in the amount of loans and debts to capital existing, unless loans in the aggregate, is 18 per cent., or less than two-fold in 1859, against 102 per cent. in 1858, 21 per cent. in 1857, and 18 per cent. in 1856.

It is the opinion of Mr. Green, that the value of good dividends will be increased, and that the market price of stocks will be increased, as far as the market will make him find it necessary to go to New York. Whether the market will be able to sustain its present value, is a question which can only be decided by experience.

The Liverpool Steamship Company, is the enterprise man in Europe, and if the Great Ship Company know their own interest, they will charter the Leviathan to conquer the seas.

Mr. Green, also, thinks that they hold their own in Liverpool.

A BOAT RAILROAD COMPANY.—The vision of Egypt has a sufficient good taste to patronize Egyptian manufacturers. We learn from the Springfield (Mass.) Republican that a vessel in that State has just embarked, at a cost of \$10,000, a mægnetic railroad, intended for the use of the above company, having a revenue of \$100,000.

An INDIVIDUAL WHO RECOGNIZES THE UNITED STATES.—An item headed "Shockoeburg" appeared in the New York Evening Post a few days ago, purporting to give the names of persons excepted from the service of the United States.

We copy the extract from the paper of the latter, as a remarkable place of compilation.
